

eeZee web is a fast, reliable & secure way for Merchants to accept card payments for mail or telephone orders or even send out payments against the customers mobile phone.

Perfect for call centres, transportation providers or even takeaway restaurants, **eeZee web** accepts fast card payment from all major credit & debit card schemes.

In stead of doing the job and then sending out an invoice, with **eeZee web** you can ask for the payment up front, then do the job. All the transactions you send out can be monitored in the web browser. This allows you to see when a transaction has been approved in real time. **eeZee web** can replace all your invoices and the high cost attached to sending out invoices.

Simply enter card and cardholder details into a secure online form and wait a few moments for the authorisations. **eeZee web** is certified through our secure payment gateway, removing you from the onerous scope of PCI DSS. There are no technical interface requirements to use eeZee web, just log-in and input the required card data for fast, reliable & secure transactions.

Providing full visibility of the status of your transaction, all **eeZee** products are linked to our reporting suite allowing you to monitor day by day business critical data such as gross turnover, rejected payments & refunds.

The Payment House has access to the best merchant service rates across Europe & will work with you to ensure you receive the most competitive rates available for your scale of business. Once terms are agreed, we can get you set-up & running in no time!

The Payment House are global experts in delivering app based software solutions with built in payment functionality. Our mission is to provide access to best in class technology at a budget to suit all needs. We are currently located in: London, Oslo, Stockholm and Riga.

Please visit www.thepaymenthouse.com for further contact information. We look forward to hearing from you.

Or **contact** us at eezeeweb@thepaymenthouse.com

eeZee web is fully compatible with additional Payment House products:

- **eeZee pos** - Card Holder present transactions via a contactless PIN reader.
- **eeZee shop** – Online or in-app payment linked to a shopping cart program.
- **eeZee pay** – Pushing payments direct to a registered mobile device for approval.
