

Globally deployed, **eeZee pos** is a simple to use app based payment solution that allows all merchants, to use their smart phone or tablet (iOS or Android) to request card payment, whether they are in-store or on the move.

eeZee pos facilitates fast, reliable and secure payment acceptance by utilising either a low-cost contactless PIN reader or pushing a payment request direct to a customers mobile phone for approval using the **eeZee pay** wallet facility.

eeZee pos allows your customers freedom of payment via familiar and trusted payment methods, speeding up the transaction process and more importantly allowing you to project a professional & reliable image, helping you to sustain & grow your business.

The Payment House has access to the best merchant service rates across Europe & will work with you to ensure you receive the most competitive rates available for your scale of business. Once terms are agreed, we can get you set-up & get you trading in no time!

eeZee pos also interfaces with other **Payment House** products & services allowing merchants a full range of payment solutions to cater for your business needs:

- eeZee web – Online payment via web enabled virtual terminal.
- eeZee shop – Accept payments linked to a shopping cart
- Reporting Tools – Allowing you to monitor & track payments

The Payment House

– All your payment needs under one roof!
